『はるばる日本からの原木』

从日本远道而来的原木
LOGS FROM REMOTE JAPAN

它们扎根在属于自己的角落，忍耐、平淡、努力向上生长，凝缩岁月和自然的意志，光、土、水、风自然孕育，终于成为了林中的大树。它们是自然赋予的珍贵礼物，见证了森林的时光流转，四散出岁月的味道。亲近自然，回归生活本真，木材无异是最佳的选择。

The wooden materials are from trees that have rooted in their own plots for a long time, with endurance and simplicity, endeavoring to grow, condensing the essence of the years and the nature, weathering the sunlight, soil, water, gusts, until they become giant timbers in forests. They are the most precious gifts bestowed by the nature, witnessing the elapse of time through the forest, and emitting the vintage flavor of the years. To embrace the nature and to explore in depth the truth of life, wood is invariably the best choice.

榿木 / 榿

榿木质地均匀，色调柔和流畅，坚硬厚重，耐久性在1~2000年的建筑中也可看到，在日本常用于城堡、神社、寺庙等高级木建筑。

Beeches are featured in even texture with soft and smooth color, considerable hardness and density. Its durability is proven by the constructions dated some 2000 years ago. It is commonly used in Japan for high-grade wooden buildings such as castles, shrines and temples.

榿木 / 檜

榿木因好看的颜色以及杀菌的功能，且容易加工在建筑中受到重用，但因其产地稀少，成材难，产量小，以及所具有的一系列优良特性而价值不凡。

Elms are widely used in construction due to their good-looking colors and bactericidal features. They are expensive too because of their rarity in production, difficulties in growth, small output, and a series of excellent properties.

七叶 / 栎

日本最有人气的木材，从细到粗都有七叶的特殊纹路在任何一个切面都可以清晰的表现出木纹的美感，独特的文理，让每一件作品都是独一无二的。

As one of the most popular wooden material in Japan, horse chestnut trees feature in special textures of various thicknesses, clearly expressing the beauty of the wood grain on every cutting face. Their unique textures ensure that every piece of furniture made out of them is the only one on this planet.

一枚板系列
One Board Series

一枚板シリーズ

一枚板系列是大角木创最重量级的一个系列，重量二字的形容不仅基于一枚板的自重，更是因为其本身蕴藏的时间厚度。一枚板原材料全为日本进口榉木、杉木、七叶、桧木，由经验丰富的艺术工匠加工完成，经过上百年生长的木材凝聚了各种韵味，工匠们保留了这些特质，尽最大努力让自然的东西保存下来，并赋予木头新的魅力。

One Board Series is the most valuable series of DAJIAOWOOD. The value of this series does not lie in the weight cause by its density, but also in its time-honored vintages. All the raw materials of One-board Series are imported from Japan, including beeches, firs, horse chestnut trees, and elms, which are processed by experienced artisans into shapes. These wood materials have grown for hundreds of years before they are made into craft pieces, emitting sense of gorgeous primitive charms, which are preserved by craftsmen, so that they can bring the large part of nature into life.
